MANUTRI BUILDING STEPS!

Designed by Daniel Lipkowitz

The Manutri are flightless birds who spend some of their time on the ice ring around Voya Nui, and most of the rest of it diving for prey in the cold sea. Altered and trained by Karzahni, they have been turned into a fighting force by him. He has outfitted them with squid launchers and Cordak blasters scavenged from the Barraki weapons caves and plans to unleash them on Toa and Barraki alike!

You can build a Manutri using pieces from 8913 Toa Mahri Nuparu, 8915 Toa Mahri Matoro, 8918 Carapar and 8919 Mantax.
